OBJECTIVE

Ambitious and enthusiastic Front-end developer wanted to utilize my programming skills to develop reliable, efficient and user-friendly websites and contribute to the organization growth with dedication towards the work.

PROJECTS

My Portfolio - [Lakshmi Prasanna.com](#)

I developed a website to showcase all my work at one place. This website contains all my projects, skills and all my details.

Github code: [Source Code](#)

Pool My Ride website - [poolmyride.com](#)

It is an online platform for sharing a ride, where users can login and view the details of the ride like date and time of the ride, owner details, car details etc.

I have built it as my Final year project to put light on traffic problems and fuel consumption.

Github code: [Source Code](#)

Bookshell website — [bookshell.com](#)

Bookshell is a website for selling and buying many types of books like academics, self help and many more, users can login and view the posted books.

It is my Internship project, I built this project with an idea of sharing books that we no longer needed.

Github Code: [Source Code](#)

Student website — [student.com](#)

Student is a website for KITS engineering college, I have built it for my college project expo competition. Here we can find all the details about the college like courses, placements, events and many more.
